MOHD MOAZZAM

Full-Stack Developer | Node.js · NestJS · React.js · TypeScript · PostgreSQL
mohdmozzam27@gmail.com | +91 9568571863 | linkedin.com/in/mohd-moazzam | github.com/mohdmoazzam
Portfolio: mohdmoazzam.vercel.app

SUMMARY

Full-stack developer with **4 years** of experience building production web applications with Node.js, NestJS and React.js, including a recruiting SaaS product and a social platform with **100,000+ active users**. Cut API response times by **40%** through query optimization, Redis caching and pagination, and made search **45% faster** with Elasticsearch. Ships features end to end, from PostgreSQL and MongoDB schemas and RBAC-secured REST APIs to real-time WebSocket experiences and LLM-powered assessment tooling.

EDUCATION

B.Tech · Amrapali Institute of Technology, Haldwani, Uttarakhand — 2019 – 2022

Diploma in Computer Science Engineering · Govt. Polytechnic College, Kashipur — 2015 – 2018

TECHNICAL SKILLS

Backend: Node.js, NestJS, Express.js, REST API Design, WebSocket, Microservices, System Design, DSA
Frontend: React.js, Tailwind CSS, HTML, CSS
Languages: TypeScript, JavaScript, SQL
Databases & Search: PostgreSQL, MongoDB, Redis, Elasticsearch
Cloud & DevOps: AWS (EC2, S3), Docker, Git
AI: OpenAI API, Grok API, AI-assisted development (Claude Code, ChatGPT)

EXPERIENCE

Associate Developer · AppSierra — Nov 2022 – Present
Noida, Uttar Pradesh, India

PitchNHire — Applicant Tracking System (app.pitchnhire.com)
NestJS, Node.js, TypeScript, PostgreSQL, Elasticsearch, Redis

- **Cut API response times by 40%** by rewriting slow SQL queries, adding Redis caching and paginating large result sets across candidate and job endpoints.
- **Made search 45% faster** by integrating Elasticsearch for advanced queries over high-volume resume and job data.
- Built the REST APIs behind the core hiring workflow: candidate management, job posting, recruiter pipelines and interview scheduling.
- Designed role-based access control (RBAC) that separates candidate, recruiter and hiring-manager permissions across the platform.
- Designed PostgreSQL schemas and tuned SQL queries to keep high-volume resume and job data fast to query.

Palify — Gamified Professional Networking Platform (palify.io)
Node.js, React.js, WebSocket · Full-stack

- **Built and scaled the full-stack platform to 100,000+ active users**, combining networking, content creation, job applications and creator monetization in a single profile.
- Built a real-time notification system on WebSocket that delivers likes, comments, follows and messages to users instantly.
- Shipped real-time chat with persistent message history and typing indicators, increasing user engagement and retention.

PROJECTS

Intuvos — Online Assessment & Proctoring Platform (intuvos.com)
NestJS, Node.js, React.js, OpenAI API, Grok API

- Built an assessment platform supporting MCQ tests, AI-driven (agentic) assessments and technical screenings.
- **Automated answer evaluation** by integrating OpenAI and Grok APIs to score candidate responses, replacing manual review with consistent LLM-based scoring.
- Built automated proctoring with post-assessment integrity reports for hiring teams.

CERTIFICATIONS

Web Development Bootcamp · Code Help — View Certificate

- Built and deployed full-stack **MERN** applications (MongoDB, Express.js, React.js, Node.js) with authentication, RESTful APIs and responsive UIs.
- Used Git-based version control and collaborative workflows across team projects.

JavaScript · NamasteDev — View Certificate

- Mastered core JavaScript internals, including closures, scope, hoisting and asynchronous programming.
- Applied them to writing clean, efficient JavaScript for both browser and Node.js environments.
